

Pumkin's Perimeter

This is my idea I implemented at the TriCities Waterfollies and was accepted with great comments and more than one comment like:

“Pumkin no one else does this, that's so awesome” **Mike Wiskus**

“That is a great idea, all shows should use this” **Buck Roetman**

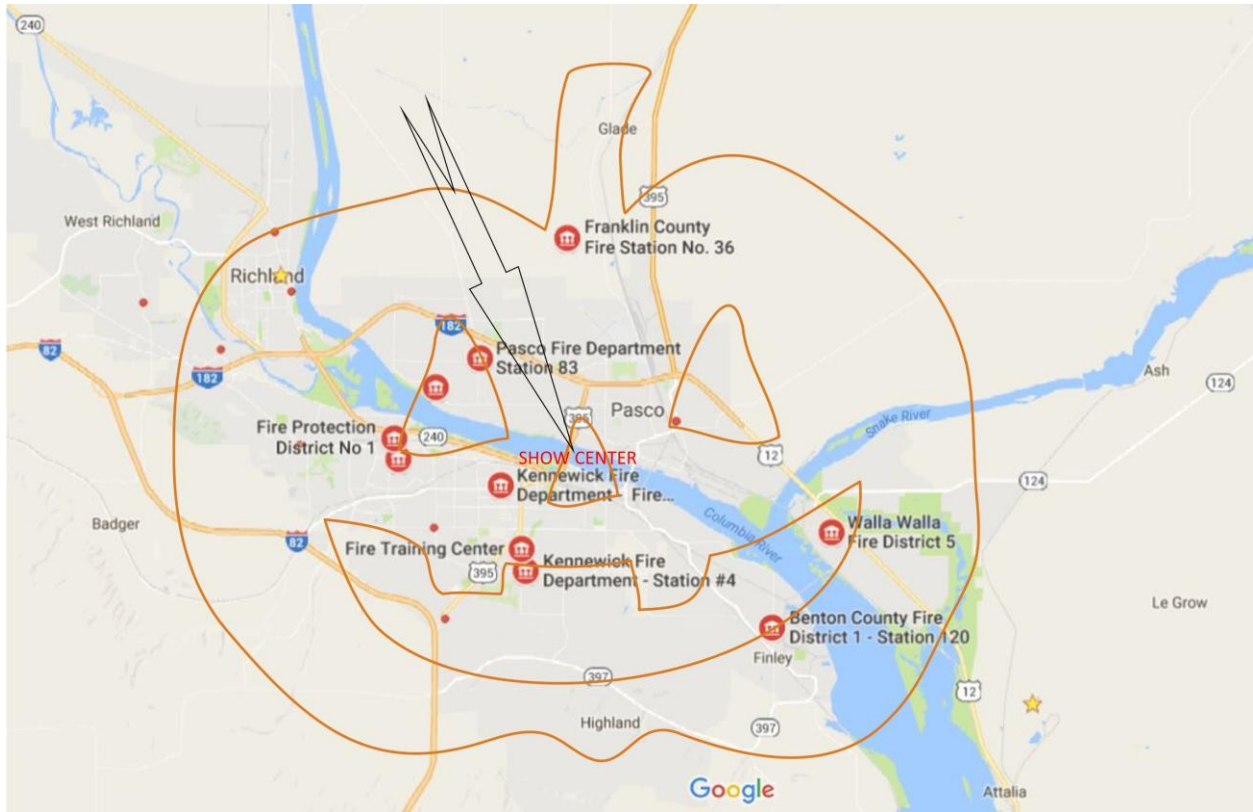

So....Pumkin's Perimeter is a 10 mile circle from show center and in that circle there are more than one Fire Station. You are all saying ah...yes for sure!

Ok but what I did was when we had meetings for our Airshow we had a local Fire Captain from Kennewick and I asked him, would you be able to email all Fire Chiefs and Captains copies of all the Emergency Extraction Procedures to all Fire Hall reps in the Perimeter, his answer was absolutely no problem. REMEMBER folks accidents do not always happen on the field or at show center.

Hence Pumkin's Perimeter was started. All stations printed copies for crews to read. (As a Ramp Boss, I had permission from Airshow Director) end result was very well received and added another layer of SAFETY for our performers and public.

This is a snip of the map (Google Maps) of Tri Cities and the surrounding Fire Stations!

To find all your Fire Stations just use Google Maps and Type “Fire Station” they will appear like shown below, minus the Pumkin Perimeter!

Email me if you want help setting one up
